## Delviom Case Studies - Federal

### U.S. GSA Presidential Transition Team (PTT)

**Customer's Challenge:** Assessments to ensure implemented security controls and risk mitigation in PTT IT solutions

**Delviom's Solution:** Delviom played a pivotal role in securing the PTT's IT infrastructure, seamlessly integrating advanced security measures through efficient Security, Verification, and Validation (SVV) services, including penetration testing and security assessments of on-prem and cloud systems based on Zero Trust Architecture, tightly coupled with cutting-edge technologies, resulting in a comprehensive security assessment that maximizes efficiency and accuracy.

**Outcome/Benefits:** The approach sped up security assessments, ensuring critical IT infrastructure met strict standards and strengthened PTT's defenses.

### U.S. Department of Agriculture (USDA) – Rural Development

**Customer's Challenge:** Implementation of Secure SDLC

**Delviom's Solution:** Delviom worked with RD OCIO to provide Security Architecture & Engineering services, Privacy support and Vulnerability Assessments. Delviom set up the framework and implementation of a Secure SDLC that included Baseline Security Requirements, Stage Gates, Secure Design and Architecture reviews and Vulnerability Assessments. We also worked on the Quality Assurance team to provide Test Automation services.

**Outcome/Benefits:** This provided the client a true picture of code security and allowed Security to be plugged into all aspects of the SDLC.

### U.S. DHS – Federal Emergency Management Agency (FEMA)

**Customer's Challenge:** Cross-agency cybersecurity Support

**Delviom's Solution:** Delviom established the CISO Operational Risk Management Board and Secretariat for the RMF Division. We achieved 100% Compliance on the agency Cybersecurity Scorecard under the Road to Green program. Delviom supported the Security by Design Architecture that baked Security into the FEMA acquisition process. We established a FedRAMP PMO function to provide continuous access to packages supporting agency cloud migration.

**Outcome/Benefits:** Engaged all stakeholders and allowed Security to become a collaborative integrated partner with agency PMOS.

### U.S. Securities and Exchange Commission (SEC)

**Customer's Challenge:** Implementation of Vulnerability Discovery, Bug Bounty and Penetration Testing services

**Delviom's Solution:** Delviom implemented a Bug Bounty Program that covered Researcher Management, Test Management, Penetration Testing on infrastructure and systems. Further, Delviom implemented a Vulnerability Disclosure Platform to manage submissions, reporting and payments.

**Outcome/Benefits:** The program allowed the involvement of expert commercial security researchers via crowdsourcing which allowed discovery of previously unknown vulnerabilities.

### Department of the Treasury (Treasury)

**Customer's Challenge:** Implementation of Cybersecurity Operations Support Services

**Delviom's Solution:** Delviom provides comprehensive cybersecurity support for the Treasury OCIO Enterprise Applications Directorate's Enterprise Applications Cybersecurity (EAC) Program and the Office of Intelligence and Analysis (OIA) Security Operations Center (SOC) providing vulnerability management and continuous monitoring of classified networks.

**Outcome/Benefits:** Delviom personnel optimized Treasury's security assessment tools to ensure continuous coverage of hybrid environments.

### Federal Communications Commission (FCC)

**Customer's Challenge:** Security Test and Evaluation (ST&E) Support Services

**Delviom's Solution:** Delviom provides security advisory, security architecture, and testing support to the FCC OCIO Cybersecurity Group and CISO for the entire FCC enterprise including High Value Assets (HVA). Delviom conducts and documents independent ST&E of FCC systems according to NIST standards, FISMA guidelines, and FCC policy and procedures.

**Outcome/Benefits:** Delviom's security testing and cybersecurity architecture reviews improved visibility and facilitated risk-based decision making.
