Delviom Sample Projects

Government: Federal/State

Nebraska National Guard Bureau

Delviom provided cybersecurity technical advisory role to the G6, SISO, ISSO and ISSM that are responsible for the Nebraska National Guard's plans and policies associated with Risk Management Framework (RMF) certification and accreditation of its automated information systems, business continuity of operations, and disaster recovery. Advised on SIPR process improvement for overall cybersecurity readiness, guided remediation of IA vulnerable clients and network devices. Supported Staff Assist Visit (SAV) and Command Cyber Readiness Inspection (CCRI) by reviewing policies and procedures and providing crucial recommends for improvement along with providing STIG reviews and fix recommendations of SIPR devices.

U.S. Department of Agriculture - NRCS

Delviom has been working as part of the Security Engineering and Architecture (SEA) team by providing application security leadership to the agency level by assisting the USDA NRCS CIO's organization to implement their security and privacy program. Delviom also helped build, setup and deploy the Enterprise Scan Server. Delviom also led the setup of a security test lab to build an Application Security Center of Excellence. Delviom provided help in improving the vulnerability assessment process for the NRCS agency applications for SDLC and Continuous Monitoring, per OMB and FISMA standards.

Delviom was also tasked to provide Portfolio/Program/Project Management support to USDA NRCS OCIO specifically in the areas of Schedule Management, Earned Value Management, and Risk Management. This contract provided Program Management Office support for IT investments, project and portfolio management. Delviom also developed and provided enterprise governance and services. Delviom provides PMO support to the IT Governance Team at NRCS OCIO.

District of Columbia, Office of the Chief Financial Officer

Delviom teamed with the prime contractor to provide implementation and integration support for the Enterprise Data Warehouse architecture while OCFO was in the process of replacing their old tax system with Modernized Integrated Tax System.

Securities and Exchange Commission

Delviom is providing independent expert technical services to plan and conduct penetration testing of SEC web applications, and to report findings and potential mitigation strategies. The objective is to provide insight into vulnerabilities and risk of exploit of important SEC applications and their underlying data.

Commercial

Delviom is supporting multiple commercial Clients in different sectors on building Business Intelligence framework, Enterprise Datawarehouse solutions, Application Development, Devops and Test Automation framework.
